

AVID

AVID Integrated provide a high quality & hassle free 3D animation service, taking your product from an idea to a marketable vision. Videos are styled inline with your brand.

THE PROCESS

STAGE

OUTCOMES

We discuss the project and take time to understand your product - it's functionality, customer/consumer benefits and details that should be communicated in the video.

A storyboard is developed showing stage-by-stage/scene-by-scene what will be shown in the video. It will detail the content, movement and durations of scenes which is important to establish the scope of the project. At this point we can provide a quote.

On acceptance of our quote, we commence work - creating models and assets if required or supplied by you to AVID Integrated.

On delivery of the draft, you can request changes. Please note, changes that fall outside the scope of the storyboard may require a modified quote.

Second draft is delivered for approval for final rendering or to request further changes. Please note: changes made at this stage may incur additional costs which can be discussed prior to continuation.

We render out the full animation in high quality and deliver to you via dropbox or a large file transfer service, such as 'wetransfer'.

We can deliver in any file format you require. For most uses MP4 format with H264 encoding is best - we deliver in a higher bitrate (quality) than any current streaming service such as YouTube or Vimeo. If you prefer a lower bitrate video (smaller size) just let us know.
